PROFILE

MCA graduate with experience in full-stack development using C#, ASP.NET Core, Angular, and REST APIs. Experienced in building scalable applications and working with modern development practices, including Azure DevOps, application monitoring, and modern development workflows. Strong analytical and problem-solving skills with a growing interest in DevOps, cloud technologies, and scalable software solutions.

EDUCATION

Master of Computer Applications

June 2024 - March 2026

Rajagiri College of Social Sciences (Autonomous), Kalamassery

SGPA: 8.37

Bachelor of Science in Chemistry

Nov 2021 - April 2024

Kerala University

SGPA: 8.78

EXPERIENCE

H&R Block (India) Private Limited

Dec 2025 - June 2026

Software Developer Intern, Thiruvananthapuram, Kerala

- Built full-stack applications using Angular and .NET, designing and integrating REST APIs to enable efficient data communication across services.
- Managed dependencies using Azure DevOps Artifact Feeds to maintain consistent package versioning and minimize integration conflicts.
- Monitored application performance in Azure, analyzed system metrics, and debugged issues to enhance system stability and minimize runtime errors.

Revstar Solutions

June 2025

HR and Marketing Intern, Remote

- Coordinated candidate workflows and supported daily HR operations in recruitment processes.
- Managed email communications and maintained CRM records, enabling smooth coordination across HR, marketing, and administrative functions.

H&R Block (India) Private Limited

April 2025 - May 2025

Full-Stack Developer Intern, Thiruvananthapuram, Kerala

- Developed a full-stack Hospital Management System using Angular and .NET, enabling efficient handling of patient, doctor, and appointment workflows.
- Collaborated with developers to integrate frontend, backend, and database components, improving system functionality and reducing integration gaps.

CERTIFICATIONS AND WORKSHOPS

Diploma in Computer Applications

Dec 2023 - May 2024

Centre for Continuing Education Kerala (Govt. of Kerala)

Programming in C++ Certification

Apr 2023 - Nov 2023

Centre for Continuing Education Kerala (Govt. of Kerala)

Build ASP.NET Core Web API - Scratch To Finish (.NET 8)

July 2025

Udemy

Learning C#

April 2025

LinkedIn Learning

Inspired Software Development, Kochi

- Attended a two-day hands-on workshop focused on practical database administration.
- Gained experience in managing, maintaining, and optimizing database systems.

PROJECTS

OpsNexus AI Operational Intelligence Portal | Angular, FastAPI, Azure DevOps, SharePoint, Chart.js

- Developed a full-stack cloud cost governance platform to analyze Azure resource utilization and provide optimization recommendations with projected cost savings.
- Integrated Azure DevOps REST APIs to automate work item creation from recommendations, incorporating resource metrics, priorities, and estimated savings.
- Built secure Microsoft Graph API integrations using Azure AD OAuth to automate report uploads through Microsoft Teams and manage historical run tracking.
- Designed interactive Angular dashboards using Chart.js, enabling analytics visualization, archive browsing, and schema-version compatibility across evolving report formats.

EOP Artifacts Integration & Runtime Model Generator | Angular, .NET, Azure DevOps, Swagger

- Implemented an enterprise-grade solution integrating Azure DevOps Artifacts to securely retrieve and manage package metadata, versions, and dependencies from private feeds via backend APIs.
- Enabled dynamic runtime model generation using reflection and AssemblyLoadContext, allowing JSON schema creation without compile-time dependencies, along with SDK exploration and dependency mapping.
- Developed an interactive Angular UI for publisher and event selection, version-based models, JSON preview, and schema comparison to improve developer efficiency.

LUMI AI Meeting Assistant | Angular, FastAPI, Azure OpenAI, Azure DevOps

- Developed a Microsoft Teams integrated AI assistant for automated meeting summarization, context aware Q&A, and work item generation.
- Integrated Azure OpenAI to extract key points, decisions, and structured action items from meeting transcripts.
- Implemented a full-stack solution using Angular and FastAPI with RAG to deliver accurate, context driven responses.

Hospital Management System | Angular, ASP.NET Core MVC, SQL Server

- Developed a full-stack Hospital Management System using Angular for the frontend and ASP.NET Core MVC for the backend, enabling efficient management of patients, doctors, appointments, and medical records with role-based access.
- Implemented using ASP.NET Core, Angular, Entity Framework Core, and SQL Server with a layered architecture separating controllers and business/data logic.

Inventory Management System | Java Swing, SQL

- Built an Inventory Management System using Java Swing and SQL for real-time product tracking.
- Enabled efficient operations including adding, viewing, and updating inventory, reducing manual errors and improving data accuracy.

AI-Based Hand Gesture Math Solver | Python, OpenCV, Streamlit, Gemini 1.5 Flash API

- Designed a math solver that interprets mid-air hand gestures and solves problems.
- Integrated a chat-bot for math queries, enhancing accessibility and usability in learning spaces.

TECHNICAL SKILLS

Programming Languages	C, C++, Java, Python
Frontend	HTML, CSS, JavaScript, Angular
Backend	ASP.NET Core, FastAPI, REST API Development
Databases	MySQL, SQL Server (SSMS)
Cloud & Tools	Azure DevOps, Azure OpenAI, Swagger
Version Control	Git, GitHub
